WARNING:

Capsaicin sprays have proven effective in repelling aggressive bears only when sprayed directly in the eyes and nose, and should be used only as a last resort. Capsaicin sprays will not repel bears from treated objects or areas, and may result in increased investigation of sites by bears. Canisters should not be test fired in areas inhabited by bears. If a canister has been test fired, all residues of product should be washed from the canister nozzle and cap with soap and water before being transported to areas inhabited by bears.
